

Aries

Early maturing
Great Northern

GREAT NORTHERN BEAN

Profile:

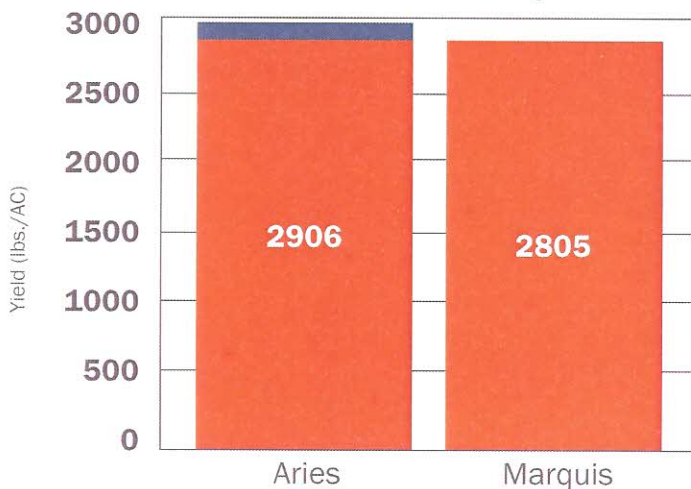

Aries is a Great Northern bean variety ideally suited to Nebraska and Colorado production regions. A consistent performer throughout the trialing process, its upright architecture, slightly earlier maturity, and excellent yield potential make it an excellent choice for Nebraska and Colorado growers.

Economic Profile:

Assuming a 100 lbs./AC yield advantage compared to Marquis.* Growing Aries will potentially increase your profit by \$45/AC on \$45/cwt. beans. This amounts to \$4,500 on 100 acres and the added benefit of upright architecture and an earlier maturity.

ARIES VS. MARQUIS

Data from 2005–2013 with trials in Gering, Mitchell, Scottsbluff, Twin Falls, ID and more.

TRIAL DATA

Aries

Approx. Maturity	87-91 days**
Plant Type	2B
Approx. Seed Count	1,256 seeds/lb.***
Disease Resistance	IR:BCMV Ua****

* Yield data based on 20 yr./locations of data.

** Maturity data is based on 17 yr./locations of data.

*** Seed count data is based on 12 yr./locations of data.
