

NAVY HMS Victory 15094

Higher Yield and Earlier than HMS Medalist Good Canner****

Navy HMS Victory <15094> is a broadly adapted navy bean variety ideally suited to North Dakota, Minnesota, Michigan, and Ontario production regions. A consistent performer throughout the trialing process and in commercial production, its upright architecture, high pod set, and excellent yield potential make it an excellent choice for direct harvesting and conventional growers.

Assuming the 150 lbs./AC* yield increase over HMS Medalist, profit would increase \$45/AC on \$30/cwt beans. This would amount to \$4,500 increased profit over HMS Medalist on 100 acres of production while maturing about 3 days earlier than HMS Medalist**.

- Excellent upright architecture suitable for direct harvest.
- Matures 92–96 days or about 3 days earlier than HMS Medalist**
- Approximate seed count of HMS Victory is 2,293 sds./lb. as compared to HMS Medalist at 2,415 sds./lb****
- HMS Victory <15094> has shown similar mold tolerance as HMS Medalist.
- HMS Victory <15094> has the “I” gene for bean common mosaic virus shown similar resistance to rust as HMS Medalist in the CSU rust trials.
