

Pinto 'Rustler'

New!! High Yielding Short/Mid Season Pinto

Rustler <16400> has shown broad adaptability in trials throughout the High Plains, Idaho and in the MINDAK region. Rustler is semi-indeterminate, semi-upright in its architecture and provides great yield potential to the grower in an early/mid-season maturity.

Limited data collection opportunities in the last few years limits the ability to have good comparisons to check varieties in the area; however the data from MINDAK, Nebraska, and Idaho has all been promising for this earlier maturing variety. Rustler maintains comparable yields to check varieties in the areas and has the potential for being as early as Windbreaker.

Rustler compares the closest to Windbreaker with a similar yield, maturity, and seed count; however Rustler has an improved archetype that may allow it for direct harvest. There is potential for better adaptability to different regions and potential for earlier maturity than Windbreaker as well.

The sum of these observations and data has prompted the naming and release of the variety. Revised brochures with more comprehensive yield, maturity, and seed count information from the region will be added to future brochure revisions.

- Good upright architecture that may allow for direct harvest.
- Rustler <16400> has shown to have about the same maturity as Windbreaker.**
- Approximate seed count for Rustler is 1,138 sds./lb. as compared to Windbreaker at 1,152 sds./lb.***
- Good seed color, appearance and shape.
- Resistant to Rust strains tested for at Colorado State University
- Some field tolerance to Common Bacterial Blight has been observed.

**TO PURCHASE SEED:
CONTACT YOUR LOCAL DEALER**

*Yield data based on 6 yr./locations of data.

**Maturity data is based on 5 yr./locations of data, field observations, and data from Idaho and Nebraska.

***Seed count data is based on 6 yr./locations of data.

Data from trials in Buxton, Forest River, and Hatton, ND.

Pinto 'Rustler'

New!! High Yielding Short/Mid Season Pinto

PT Rustler was developed through ProVita, Inc.'s pinto breeding program through a contract with ADM and is the sole property of ADM.

**Plant Variety Protection for PT Rustler is applied for.
Unauthorized propagation of this variety is prohibited.**

**Utility Patent for PT Rustler is pending.
Unauthorized propagation of this variety is prohibited by law.**

**Rustler is the sole property of ADM and is protected by U.S. Plant Variety protection
and a U.S. Utility Patent. Any use of this variety for any purpose without express written
consent of ADM is prohibited under U.S. Patent law.**

All variety information presented herein is based on field and laboratory observations. Actual crop yield and quality are dependent upon many factors beyond our control. Since environmental conditions and local practices may affect variety characteristics and performance, we disclaim legal responsibility therefore. Read all tags and labels. They contain important conditions of sale, including limitations of warranties and remedies.
