Contains a source of live (viable) naturally occurring microorganisms.

INSTRUCTIONS FOR FEEDING

GROSTRONG® 33 Ration Balancer is designed to be fed as a supplement. Forage should be offered at 2 to 3 lb per 100 lb of body weight daily. This product can be used as a traditional feed, topdress, or mixed in feeders for grain mixes. Maintenance and Light Performance: feed 0.05 to 0.15 lb of GROSTRONG® 33 Ration Balancer per 100 lb of body weight daily. Moderate Performance and Early Gestation (1st and 2nd Trimester): feed 0.1 to 0.2 lb of GROSTRONG® 33 Ration Balancer per 100 lb of body weight daily. Weanlings and Yearlings: feed 0.10 to 0.30 lb GROSTRONG® 33 Ration Balancer per 100 lb of body weight daily. Long Yearlings and 2 Year Olds: feed 0.1 to 0.2 lb GROSTRONG® 33 Ration Balancer per 100 lb of body weight daily. TOP-DRESS: feed 2 lb per 100 lb of body weight daily, top-dress with 0.15 to 0.2 lb of GROSTRONG® 33 Ration Balancer per 100 lb of body weight daily. Mixers Pellet: mix with grains (oats, barley), etc., at a ratio of 1:4 (GROSTRONG® 33/gain). All recommendations should be made gradually over 7 to 10 days. Clean, fresh water and salt should always be available at all times. Consult with a veterinarian or ADM nutritionist for a recommended diet.

Note: The vitamin and mineral levels in GROSTRONG® 33 are greater than a traditional feed. Do not exceed the recommended feeding rate.

CAUTION: This product contains copper. Do not feed to sheep or other copper-sensitive species. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the diet is prohibited.

INGREDIENTS

Calcium Phosphate, Salt, Calcium Carbonate, Dicalcium Phosphate, Calcium Sulfate, Magnesium Oxide, Dehulled Soybean Meal, Vegetable Oil, Zinc Amino Acid Complex, Iron Oxide, Cane Molasses, Potassium Sulfate, Manganese Oxide, Manganese Sulfate, Zinc Sulfate, Zinc Oxide, Ferrous Sulfate, Vitamin A Supplement, Vitamin E Supplement, Potassium Iodide, Cobalt Carbonate, Sodium Molybdate, Sodium Selenite, Vitamin D3 Supplement.

FEEDING DIRECTIONS

Make sure sheep and llamas are not starved of salt or mineral. Remove salt and feed Moorman's Sheep Minerals with WeatherMaster free-choice.

Consumption should average 1/4 to 1/4 lb per head per month.

If consumption is below 1/4 lb per head per month:
1. Put Sheep Minerals with WeatherMaster at several different places in the lot or pasture, preferably near areas where sheep and llamas congregate or drink water.
2. Mix small amounts of grain or oil meal with Sheep Minerals with WeatherMaster.

If consumption is above 1/4 lb per head per month:
1. Move Sheep Minerals with WeatherMaster away from areas where sheep and llamas congregate or drink water.
2. Offer free-choice salt with the Sheep Minerals with WeatherMaster for 2 to 3 days. Sheep and llamas may be overconsuming Sheep Minerals with WeatherMaster because of a salt hunger.
3. Change to Sheep Mineral Block.

CAUTION: No copper compounds are added to this feed. However, naturally occurring copper in feed ingredients may combine to yield detectable copper levels. Care should be taken to minimize additional copper from forage, water or other feedstuffs available to sheep. Follow label directions. Feeding selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

INSTRUCTIONS FOR FEEDING
GROSTRONG Minerals for Horses, a cornerstone of AIM feeding programs, provides vitamins, minerals and electrolytes in a palatable formula balanced for horses.

Feed GROSTRONG Minerals for Horses by the following methods:

FREE CHOICE: When starting to feed, remove old and feed new GROSTRONG Minerals free choice at the rate of four (4) minutes per ton of feed. Monitor intake to determine if the recommended amount of GROSTRONG Minerals is consumed.

MIXED WITH FEED: For horses consuming 5% or more concentrate mix per ton daily, add 2 lb of GROSTRONG Minerals to the concentrates per ton of feed. For horses consuming 10% or more concentrate mix per ton daily, add 2 lb of GROSTRONG Minerals to the concentrates per ton of feed.

TOP DRESS OVER FEED: For GROSTRONG Minerals as follows: (1 oz = 2 level tablespoons) or

Age and work

Daily amount of

</tbody>
</table>

*Additional salt should be offered to hard-working horses to offset losses through perspiration.

Consumption of GROSTRONG Minerals for Horses will vary according to each individual horse's appetite, age, work, and body condition, as well as combination of other mineral sources in the diet.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions.

FEEDING DIRECTIONS

Moorman’s ShowTec Lamb Creep DC is designed to meet the exceptional needs of growing and blooming young show lambs. It contains a nutritionally balanced combination of vitamins, minerals and ingredients to create genetically superior show lambs. ShowTec Lamb Creep DC should be fed to lambs from 7 days of age until weaning at the rate of 0.033 lb per lb of body weight per day to provide 22.7 mg Decoquinate per 100 lb body weight (0.5 mg/kg) per day. Feed for at least 30 days during periods of coccidiosis exposure or when it is desired to be a hedged.

ShowTec #1 Mineral Supplemented should be fed free-choice to young lambs in addition to ShowTec Lamb Creep DC. To maximize creep consumption and performance, creep ration should be easily accessed by young livestock. This can be a well illuminated, dry, draft-free area where dams typically lounge.

NOTE: Always provide clean, fresh water to lambs at all times. Lambs should be kept parasite free and current on all vaccinations and medications recommended by your veterinarian.

WARNING: Do not feed to sheep producing milk for food. CAUTION: Do not use in feeds containing boronite. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed 1/3 of the crude protein of the total ration. Use only as directed. For sheep only. No copper compounds are added to this feed. However, naturally occurring copper in feed ingredients may combine to yield detectable copper levels. Care should be taken to minimize additional copper from forage, water or other feed stuffs available to sheep.

INGREDIENTS
Ground Corn, Feeding Oat Meal, Crimped Barley, Dried Wheat, Dried Soybean Meal, Calcium Salts of Fatty Acids, Cane Molasses, Calcium Carbonate, Monocalcium Phosphate, Dicalcium Phosphate, Brewers Dried Yeast (Saccharomyces), Sodium Sesquicarbonate, Sodium Propionate (A Preservative), Ethylenediamine Dihydriodide, Salt, Manganese Oxide, Manganese Sulfate, Ferrous Sulfate, Cobalt Carbonate, Zinc Sulfate, Zinc Oxide, Sodium Molybdate, Sodium Selenite, Choline Chloride, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Menadione Sodium Bisulfite Complex, Riboflavin Supplement, Niacin, d-Calcium Pantothenate, Thiamine Mononitrate, Vitamin B6, Supplement, Biotin, Pyridoxine Hydrochloride, Folic Acid, Artificial Flavor.

FEEDING DIRECTIONS
ShowTec Fast Fat is a conditioning supplement for calves weighing at least 500 lb, goats, and lambs. Top-dress rations for thin or stressed livestock with ShowTec Fast Fat at a rate of 6 to 16 oz per 100 lb of body weight per head per day. ShowTec Fast Fat can be fed during any phase of the feeding period to achieve desired body condition score.

Per day Feeding Examples:

INSTRUCTIONS FOR FEEDING

Feed GROSTRONG® PRO-VITA-MIN 20-5 Tub free-choice to horses on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed GROSTRONG® PRO-VITA-MIN 20-5 Tub continuously. Place tubs in pastures near areas frequented by horses, such as watering locations, shade or loaming areas. Place one tub for every 5 horses and place tubs far enough apart to prevent dominant horses from controlling more than one tub. Consumption may vary, depending on number of horses per tub, climate, grazing conditions, condition of horses and/or availability of other feeds. Horses should consume 1 to 2 pounds per horse daily. In situations where climate and/or other factors result in consumption other than desired, intake of supplement can be increased or decreased by adding or reducing tubs per pasture. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMequine.com. Provide adequate forage and supplemental feed as needed to maintain the desired body condition. Provide fresh access to fresh, clean water at all times.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

INGREDIENTS

Corn Distillers Dried Grains with Solubles, Dried Distillers Solubles, Soy Flour, Salt, Cane Molasses, Magnesium Oxide, Condensed Fermented Corn Extractives, Corn Germ Meal, Soybean Hulls, Vegetable Oil Refinery Lipid, Monocalcium Phosphate, Dicalcium Phosphate, Calcium Carbonate, Zinc Oxide, Manganese Oxide, Copper Sulfate, Difluorinated Phosphate, Ferric Sulfate, Mineral Oil, d-alpha Tocopheryl Acetate and dl-alpha Tocopheryl Acetate (sources of Vitamin E), Biotin, Vitamin A Acetate, Cholecalciferol, Cobalt Carbonate, Calcium Panthothenate, Sodium Selenite, Thiamine Mononitrate, Riboflavin Supplement, Niacin Supplement, Potassium Iodide, Vitamin B₃, Supplement, L-Lysine.

INSTRUCTIONS FOR FEEDING

Feed GROSTRONG PRO-VITA-MIN 20-5 Tub free-choice to horses on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for caloric or minerals. Feed GROSTRONG PRO-VITA-MIN 20-5 Tub continuously. Place tubs in pastures near areas frequented by horses, such as watering locations, shade or loafing areas. Place one tub for every 5 horses and place tubs far enough apart to prevent dominant horses from controlling more than one tub. Consumption may vary depending on number of horses per tub, climate, grazing conditions, condition of horses and availability of other feeds. Horses should consume 1 to 2 pounds per horse daily. In situations where climate and/or other factors result in consumption other than as desired, intake of supplement can be increased or decreased by adding or removing tubs per pasture. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMenquine.com. Provide adequate forage and supplemental feed as needed to maintain the desired body condition. Provide free access to fresh, clean water at all times.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

FEEDING DIRECTIONS
EWES: Feed ShowTec Ewe Breeder Feed to ewes during late gestation and during lactation at the
rate of 1.5 to 2.0 lb per head per day depending on the body condition of the ewe, the quality of the
forage and the number of lambs nursing. Feed at least 1.5 lb of forage to ewes with each pound of
ShowTec Ewe Breeder Feed.
PYGMY GOATS: Feed 0.5 to 2.0 lbs per head per day depending on body condition to growing goats,
dry does, including does and bucks.
ALPACA AND LLAMAS: Feed at the rate of 1 lb per head per day to growing alpacas and llamas or
for maintenance.
FOR ALL: Always feed good quality pasture or hay free-choice. Provide clean, fresh water at all times.
Provide mineral supplementation as desired.
CAUTION: This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-
protein nitrogen should not exceed 1/3 of the crude protein of the total ration. Use only as directed.

KEEP OUT OF REACH OF CHILDREN

CAUTION

USE AND MIXING DIRECTIONS

STORAGE AND DISPOSAL: Do not contaminate water or food by storage or disposal.

STORAGE: Store in a cool, dry place. Do not contaminate with pesticides or fertilizers.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

FEEDING DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product only prevents the development of house flies, stable flies, face flies, horn flies, and other flies and reduces breeding flies in the manure of treated swine, but is not effective against existing adult flies. Begin use early in the spring, 30 days before flies begin to appear, and continue feeding throughout the summer and into the fall until cold weather restricts fly activity. In some cases, supplemental fly control measure may be needed in and around pastures, barns, and feedlots to control adult house and stable flies which can breed in other decaying, organic matter or skin in the area, or that migrate from other locations.

ShowTec BB 18 BMD/DBZ is a complete feed formulated for pigs fed for exhibition. Feed as the sole ration to growing pigs. Transition pigs to the appropriate ShowTec product for the weight of the pigs being fed. Feed at the rate of 5.0 lbs per head per day to animals weighing 250 lbs to provide 0.2 mg diflubenzuron per kg of body weight per day. The higher inclusion rate for diflubenzuron (0.2 to 0.3 mg/kg allowed) is to be used for lighter weight pigs. Provide clean, fresh water at all times.

NOTICE: Do not use in any finished feed (supplement, concentrate or complete feed) containing in excess of 2% benzonite.

Feed Grade Biuret, Monocalcium Phosphate, Processed Grain By-Products, Calcium Sulfate of Molasses Produkts, Zinc Amino Acid Complex, Manganese Amino Acid Complex, Copper Amino Acid Complex, Selenium Yeast, Ethylenediamine Dihydroiodide, Vitamin A Supplement, Calcium Sulfate, Cobalt Carbonate, Lactic Acid, Vitamin D3 Supplement, Vitamin E Supplement, Saccharin Sodium, Natural and Artificial Flavors, 6-alpha Tocopheryl Acetate.

FEEDING DIRECTIONS
Use this product when supplemental protein is needed in addition to mineral and vitamin
supplementation. When starting to feed this product, remove salt and other minerals. Feed at the
rate of 0.25 to 1.0 pounds per head daily to beef cattle consuming grass forage. Provide clean fresh
water at all times.

If consumption is more than recommended, feed salt in addition to this product. If consumption
is less than recommended, make sure no other source of salt is available and increase the number
of feeding stations, or relocate to areas more frequented by cattle.

WARNING: This feed should be used only in accordance with instructions furnished on the label.
CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. This feed
contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen
should not exceed 1/3 of the crude protein of the total ration.

NOTE: To be fed as the sole source of selenium. Beef Cattle should not receive more than 3 mg
selenium. When mixed, rations should not contain more than 0.3 ppm selenium.

**INSTRUCTIONS FOR FEEDING**

Feed free-choice to beef cattle on pasture or roughage. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed continuously. Recommended consumption of ADM 30-15 Cattle Tub is 1.0 to 2.0 lb per head per day.

A two-week adaptation period may be required to establish a base consumption. Consumption of this product will vary according to the weight of the animal and the quality and amount of available forage.

Management of the number and location of tubs by the producer may be required to achieve target intakes. Increase the number of tubs and move the tubs closer to water or feeding areas to increase intake. Decrease the number of tubs or move farther from water or feeding areas to decrease intake.

A 10-day supply of this tub may be put out at one time. Provide at least one tub for every 15 to 20 animals.

Test your forages to determine the actual supplementation needs of your cattle. Consumption over or under the recommended levels may be adequate based on nutrient needs.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed 1/3 of the crude protein of the total rations. Use as directed.

**INSTRUCTIONS FOR FEEDING**

Feed ADM 20 All-Stock Tub w/Garlium™ free-choice to cattle, sheep and goats on pasture. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed continuously. A two-week adaptation period may be required to establish a base consumption. Recommended consumption is 1.0 to 2.0 lb per head daily for cattle, and from 0.25 to 0.50 lb per head daily for sheep and goats. A 10-day supply may be put out at one time. Provide at least one tub for every 20 to 30 animals.

Consumption of the tubs will vary according to the weight of the animal and the quality and amount of available forage. Test your forages to determine the actual supplementation needs of your animals. Consumption over or under the recommended levels may be adequate based on nutrient needs. If pasture and roughage supply inadequate energy for satisfactory growth, performance or body condition, supplemental grain or good quality roughage should be fed. Provide clean, fresh water at all times.

WARNING: Care should be taken to minimize additional copper from forage, water or other feed stuffs available to sheep. All multi-species feeds leave nutritional gaps due to differences in nutritional requirements of each species. When feeding this, or any other multi-species feed, it is recommended that a species-specific mineral supplement be fed.

### INGREDIENTS

Wheat Middlings, Soybean Hulls, Vegetable Oil, Dehydrated Alfalfa Meal, Ground Corn, Cane Molasses, Dried Soybean Meal, Lignin Sulfonate, Caustic Salt, Calcium Carbonate, L-Lysine, Calcium Propionate (A Preservative), Brewers Dry Yeast, Birdie, Vitamin A Supplement, Thiamine Mononitrate, Vitamin E Supplement, Riboflavin Supplement (B1) (Alpha Tocophenol), Ascorbic Acid, Calcium Pantothenate, Menadione Supplement, Vitamin D3 Supplement, Vitamin K2 Supplement, Calcium Salt of Tannic Acid, Preservatives, Red Yeast Rice, Dried Lactobacillus acidophilus, and Dried Lactobacillus casei.

### FEEDING DIRECTIONS

Feed 0.5 to 0.75 lb of Patriot Performance for every 100 lb of body weight (5.5 to 8.5 lb per 110 lb horse) along with at least 70 lb of good-quality forage divided into at least two meals per day. Do not feed more than 0.4 lb/100 lb of body weight per meal. Adjust feeding rate for each individual horse to maintain the desired body condition. If your horse needs less than 0.4 lb/100 lb of body weight of Patriot Performance to maintain condition, provide a GROWTH® vitamin and mineral product according to label directions. Always provide clean, fresh water and salt and a free-choice feeder. Any feed changes should be made gradually over 7 to 10 days. See bag for additional details. Consult with a veterinarian or ADM Nutritionist for recommended dosages. For more information, visit www.ADManimal.com

**WARNING:** This feed contains copper. Do not feed to sheep or other copper-sensitive species. Follow label directions. Feeding added selenium at levels less than 0.3 ppm in the finished diet is prohibited.

FEEDING DIRECTIONS
Patriot Senior Complete is formulated to be fed as the sole diet without additional forage. Feed 1.4
to 2.0 lb of Patriot Senior Complete for every 100 lb of body weight (15.5 to 22 lb per 1100 lb horse).
Offer in 3 or more equal feedings when fed as the sole diet. When fed alongside forage, feed 0.7 lb
to 1 lb of Patriot Senior Complete for every 100 lb body weight (7.5 to 11 lb per 1100 lb horse). Adjust
feeding rate for each individual horse to maintain desired body condition. If your horse needs less
than 0.5 lb per 100 lb body weight, provide a GROSTRONG® vitamin and mineral product according
to label directions. Provide clean, fresh water at all times and salt on a free-choice basis. Consult
with a veterinarian or ADM nutritionist for a recommended diet. For more information visit

WARNING: Consumption of this product by sheep or other copper sensitive species may result in
copper toxicity. Follow label directions. Feeding added selenium at levels in excess of 0.3ppm in the
total diet is prohibited.

Feeding Directions

Pelleted Feed Easy Complete is formulated to be fed as the sole diet without additional forage. Feed 1.2 to 2.0 lb of Pelleted Feed Easy Complete for every 100 lb of body weight (13 to 22 lb per 1100 lb horse) for mature horses at maintenance or work. Feed 1.3 to 2.6 lb of Pelleted Feed Easy Complete for every 100 lb of body weight (14 to 28 lb per 1100 lb horse) for gestating and lactating broodmares. Offer in 3 or more equal feedings when fed as the sole diet. When fed alongside forage, feed 0.5 to 1 lb of Pelleted Feed Easy Complete for every 100 lb of body weight (6.8 to 11 lb per 1100 lb horse). When forage is the sole dietary supply, 1 lb of Pelleted Feed Easy Complete can be used to replace 1.4 lb of forage. Adjust feeding rate for each individual horse to maintain desired body condition. If your horse needs less than 0.5 lb per 100 lb body weight, provide a STRONGER® vitamin and mineral product according to label directions. Provide clean, fresh water at all times. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information visit www.ADManimal.com.

Warning: This feed contains copper. Do not feed to sheep or any copper-sensitive species. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

INGREDIENTS
Processed Grain By-Products, Plant Protein Products, Grain Products, Roughage Products, Forage Products, Molasses Products, Calcium Carbonate, Ammonium Chloride, Lignin Sulfonate, Distillers Dried Solubles, Vegetable Oil, Salt, Calcium Propionate (A Preservative), Magnesium Oxide, Ferrous Sulfate, Cobalt Carbonate, Copper Sulfate, Calcium Iodate, Manganese Oxide, Manganese Sulfate, Zinc Oxide, Zinc Sulfate, Calcium Sulfate, Sodium Selenite, Bentonite, Hydrated Sodium Calcium Alumino Silicate, Extracted Citric Acid Preserves, Natural and Artificial Flavors, Zinc Amino Acid Complex, Thiamine Mononitrate, Vitamin E Supplement, Vitamin A Supplement, Vitamin D3 Supplement.

FEEDING DIRECTIONS
Feed complete feed continuously as the sole ration to nursing, growing, non-lactating dairy and meat kid goats. Provide clean, fresh water at all times, and an appropriate amount of forages. Make sure goats have access to clean, fresh water and forage at all times. ADM Animal Nutrition Goat Power Minerals should be offered free-choice at all times.

WARNING: This feed contains copper. Do not feed to sheep or other copper sensitive species.

Angora and pygmy breeds have been reported to be sensitive to copper supplementation.

CAUTION: Do not allow horses or other equines access to feeds containing Monensin. Ingestion of Monensin by horses has been fatal. Monensin-medicated feed is intended for use in cattle or in goats. Consumption by unapproved species may result in toxic reaction. Do not exceed the levels of monensin recommended in the feeding directions, as reduced daily gains may result. Feed only to goats being fed in confinement. Do not feed to lactating goats. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed 10% of the crude protein of the total ration. Use only as directed. Use only as directed. For goats only.

INGREDIENTS
Monocalcium Phosphate, Dicalcium Phosphate, Salt, Calcium Carbonate, Dextrose, Magnesium Oxide, Marine Fish Meal, Fish Oil, Vegetable Oil, Corn Meal, Soybean Meal, Choline Chloride, Salt, Manganese Sulfate, Zinc Sulfate, Sodium Selenite, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement.

FEEDING DIRECTIONS
Make sure goats are not starved for salt or mineral. Remove salt and feed Goat Power Mineral free choice. Consumption should average 3/4 to 1 1/4 lb per head per month.

If consumption is below 3/4 lb per head per month:
1. Put Goat Power Mineral at several different locations in the lot or pasture, preferably where goats congregate or drink water.
2. Mix small amounts of grain or soybean meal with Goat Power Mineral.

If consumption is above 1 1/4 lb per head per month:
1. Move Goat Power Mineral away from areas where goats congregate or drink water.
2. Offer free-choice salt with Goat Power Mineral for 2 to 3 days. Goats may be over-consuming Goat Power Mineral because of a salt hunger.

Make sure goats have access to clean, fresh water and forage at all times.

CAUTION: This feed contains copper. Do not feed to sheep or other copper-sensitive species. Angora and pygmy breeds have been reported to be sensitive to copper supplementation. Follow label directions. Feeding selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

INGREDIENTS

INSTRUCTIONS FOR FEEDING

Feed nursing foals, weaned, and growing at a rate of 0.5 to 1.0 lb of JUNIORGLO for every 100 lb of body weight divided into at least two meals per day along with good-quality forage. Do not feed more than 0.4 lb/100 lb body weight per meal. Feed gestating and lactating broodmares at a rate of 0.4 to 1.2 lb of JUNIORGLO for every 100 lb of body weight divided into at least two meals per day along with good-quality forage. Do not feed more than 0.4 lb/100 lb body weight per meal. Adjust feeding rate for each individual horse to maintain the desired body condition. If your horse needs less than 0.4 lb/100 lb body weight of JUNIORGLO, to maintain condition, provide a GROSTRONG® Vitamin and Mineral product according to label directions. Always provide clean, palatable water and salt as a free-choice trace. Any feed changes should be made gradually over 7 to 10 days. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMreque.com.

WARNING: This feed contains copper. Do not feed to sheep or other copper sensitive species. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

INGREDIENTS
Processed Grain By-Products, Plant Protein Products, Salt, Maize Syrup, Magnesium Oxide, Calcium Carbonate, Extracted Citric Acid Presscake, Dicalcium Phosphate, Potassium Chloride, Calcium Sulfate, Ethylenedinitrile Dihydropyridine, Manganous Oxide, Manganese Sulfate, Ferric Sulfate, Cobalt Carbonate, Zinc Sulfate, Zinc Oxide, Sodium Molybdate, Cobalt Glucoheptonate, Vitamin E Supplement, Vitamin A Supplement, Potassium Iodide, Sodium Selenite.

INSTRUCTIONS FOR FEEDING
Feed ADM Animal Nutrition Sheep & Goat Tub free-choice to sheep and goats on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed tub continuously.
Recommended consumption is 0.25 lb to 0.75 lb per head per day.
A two-week adaptation period may be required to establish a base consumption. Consumption tubes will vary according to the weight of the animal and the quality and amount of available forage. Management of the number and location of tubs by the producer may be required to achieve target intakes. Increase the number of tubs and move the tubs closer to water or feeding areas to increase intake. Decrease the number of tubs or move them farther from water or feeding areas to decrease intake.
A 10-day supply of Sheep & Goat Tub may be put out at one time. Provide at least one tub for every 15 to 20 animals.
CAUTION: Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.
NOTE: Test your forages to determine the actual supplementation needs of your sheep and goats. Consumption over or under the recommended levels may be adequate based on nutrient needs. Use only as directed. No copper compounds are added to this feed. However, naturally occurring copper in feed ingredients may combine to yield detectable copper levels. Care should be taken to minimize additional copper from forage, water, minerals or other feed stuffs available to sheep.

**INGREDIENTS**

Processed Grain By-Products, Roughage Products, Grain Products, Molasses Products, Calcium Carbonate, Salt, Lignin Sulfonate, L-Lysine, Sodium Propionate (A Preservative), Magnesium Oxide, Manganese Oxide, Zinc Oxide, Mineral Oil, Potassium Iodide, Cobalt Carbonate, Sodium Selenite, Vitamin A Supplement, Vitamin D3 Supplement.

**FEEDING DIRECTIONS**

Cattle: Feed 1-1.5% of bodyweight depending on body condition and desired weight gain. Feed good quality hay or pasture.

Sheep: Feed 0.5-1.5 pounds per 100 pounds of body weight to mature sheep. Feed good quality hay or pasture. Do NOT feed to male sheep.

Goats: Feed 0.5-1.5 pounds per 100 pounds of bodyweight to mature goats. Feed good quality hay or pasture. Do NOT feed to male goats.

Horses: Feed adult maintenance horses 0.5 pounds per 100 pounds of bodyweight depending on condition. Feed good quality hay or pasture.

For All Species: Provide clean, fresh water at all times. Feed free-choice mineral (for the appropriate species) at all times. Consult your ADM Animal Nutrition representative for specific mineral recommendations.

*Feeding Sweet Unique All Stock to male sheep and male goats is NOT recommended.

CAUTION: All multi-species feeds leave nutritional gaps due to differences in nutritional requirements of each species. When feeding this, or any other multi-species feed, it is recommended that a species-specific mineral supplement be fed. Do not feed to male goats or sheep. This feed has no added copper. Care should be taken to minimize additional copper from forage, water or other feed stuffs available to sheep.

**INGREDIENTS**

Soybean Hulls, Wheat Middlings, Dehydrated Alfalfa Meal, Lignin Sulfonate, Calcium Carbonate, Vegetable Oil, Brewers Dried Yeast (Saccharomyces), Salt.

**FEEDING DIRECTIONS**

Use Forage First Hay Extender as a partial forage (hay) replacement for all classes of horses. 1 lb of Forage First Hay Extender replaces 1 to 2 lb of hay. This product does not provide adequate vitamins or minerals and should be fed with a fortified feed or a high-quality vitamin-mineral product, such as GROSTRONG® Vitamins and Minerals. Water should be fresh, palatable and available at all times. Any feed changes should be made gradually over 7 to 10 days. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMequine.com.

Refer to ADM Animal Nutrition's Use Rate Chart for feeding the above complete feeds to various dairy and meat goats.

Make sure goats have access to clean, fresh water and forage at all times. ADM Animal Nutrition Goat Power Minerals should be offered free-choice at all times.

WARNING: This feed contains copper. Do not feed to sheep or other copper-sensitive species. Angora and pygmy breeds have been reported to be sensitive to copper supplementation.

CAUTION: Use only as directed. For goats only. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed 1/3 of the crude protein of the total ration. Follow label directions. The addition to feed of higher levels of this premix containing selenium is not permitted.

INGREDIENTS
Calcium Carbonate, Dicalcium Phosphate, Processed Grain By-Products, Salt, Molasses Products, Vegetable Oil, Manganous Oxide, Iron Oxide, Copper Sulfate, Zinc Oxide, Sodium Selenite, Magnesium Oxide, Natural and Artificial Flavors, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Calcium Iodate, Ferrous Sulfate, Cobalt Carbonate.

FEEDING DIRECTIONS
Rack Plus Deer Mineral is formulated for self feeding to deer and elk in confinement or in their natural environment as a supplement to their natural diet. Feed continuously near the source of water. Recommended consumption is 0.01 to 0.05 lb per head per day as body condition and production stage dictates.

CAUTION: Consumption of this product by sheep or goats may result in copper toxicity. Do not use in association with another feed containing supplemental selenium.

NOTE: Feeding deer or elk in the wild is illegal in some areas. Check with local wildlife officials on legality of feeding deer or elk in the wild in your specific area.

Corn Distillers Dried Grains with Solubles, Dehulled Soybean Meal, Condensed Fermented Corn Extractives, Salt, Corn Gluten Feed, Magnesium Oxide, Soy Flour, Cane Molasses, Vegetable Oil, Calcium Carbonate, Monocalcium Phosphate, Wheat Middlings, Manganese Oxide, Dicalcium Phosphate, Zinc Oxide, Copper Sulfate, Dicalcium Phosphate, Ferrous Sulfate, Potassium Iodide, Cobalt Carbonate, Sodium Selenite, Yeast Extract, Natural and Artificial Flavors, L-Lysine, Vitamin E Supplement, Biotin, Vitamin A Supplement, Thiamine Mononitrate, Riboflavin Supplement, alpha-Tocopheryl Acetate, Calcium Parathionate, Niacin Supplement, Vitamin B₁₂ Supplement, Dried Asparagus Extract, Fermentation Solubles, Extracted Citric Acid, and Spices.

INSTRUCTIONS FOR FEEDING
Feed Forage First® Summer Care Tub free-choice to horses on pasture or roughage areas. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed Forage First® Summer Care Tub continuously. Place licks in pastures near areas frequented by horses, such as watering locations, shade or loading areas. Place one lick for every 5 horses and place licks for enough amount to prevent dominant horses from controlling the lick. Consumption may vary depending on number of horses per lick, climate, grazing conditions, condition of horses and availability of other feeds. Horses should consume 1 to 2 pounds per horse per day. In situations where climate and/or other factors result in consumption other than desired, intake of supplement can be increased or decreased by adding or reducing licks per pasture. Provide adequate forage and supplemental feed as needed to maintain the desired body condition. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMequine.com. Provide free access to fresh, clean water at all times.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

NOTE: Contains capricum, which has been known to test in performance horses.

INSTRUCTIONS FOR FEEDING

Feed 0.4 to 1.0 lb of SENIORGLO® for every 100 lb of body weight (4.4 to 11 lb per 1100 lb horse) along with at least 2.0 lb of high-quality forage for every 100 lb body weight. Divide into at least two meals per day. Do not feed more than 0.4 lb of SENIORGLO per 100 lb body weight in a single meal. Adjust feeding rate for each individual horse to maintain the desired body condition. Do not exceed recommended feeding rate. If your horse needs less than 0.4 lb of SENIORGLO per 100 lb body weight of SENIORGLO to maintain condition, provide a BROADSTROBE® Vitamin and Mineral product according to label directions. Always provide clean, palatable water and salt on a free-choice basis. Any feed changes should be made gradually over 7 to 10 days. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMequine.com.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions.

Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

INGREDIENTS
Grain Products, Plant Protein Products, Animal Protein Products, Processed Grain By-Products, Dried Fermentation By-Products, Animal Fat, BHT (A Preservative), Methionin, Animal Plasma, Monocalcium Phosphate, Calcium Carbonate, Dextrose, L-Lysine, Zinc Oxide, Hydrolyzed Vegetable Oil, Mono and Diglycerides of Edible Fat-Forming Acids, Silicon Dioxide, Glycerin, Ammonium Formate, Formic Acid, Propionic Acid (preservative), Acetic Acid, Benzonic Acid, Sorbic Acid (preservative), Cichic Acid, Propylene Glycol, Salt, DL-Methione, Ferric Sulfate, Zinc Sulfate, Manganese Sulfate, Copper Sulfate, Calcium Iodate, Extracted Chlamic Acid Presscake, Roughage Products, Saccharin Sodium, Natural and Artificial Flavors, Sodium Propionate (A Preservative), L-Threonine, Dried Trichoderma reesei Fermentation Product, Dried Bacillus Licheniformis Fermentation Product, Dried Bacillus Subtilis Fermentation Product, Selenium Yeast, Chromium Propionate, Vitamin E Supplement, Calcium Pantothenate, Niacin Supplement, Biotin, Vitamin A Supplement, Menadione Nicotinamide Basulate, Pyridoxine Hydrochloride, Riboflavin Supplement, Folic Acid, Vitamin B12 Supplement, Vitamin D3 Supplement, Choline Chloride, Dried Fermentation Byproducts, Vegetable Oil, Dehydrated Pickle Paste, Fermentation Extract, L-Tryptophan.

FEEDING DIRECTIONS
MotivAte 12-15 is a complete feed specifically formulated for starting pigs. Feed continuously as the sole ration to pigs weighing 12 to 15 lbs with a history of swine dysentery but whose signs of disease have not yet occurred, or following approved treatment of disease. Provide fresh, fresh water at all times.

WARNING: Withdraw 2 days prior to slaughter.

CAUTION: Do not feed to animals other than swine. The effects of Tiamulin on swine reproductive performance, pregnancy and lactation have not been determined. Use as the only source of Tiamulin. Swine being treated with Tiamulin should not have access to feed containing polyether ionophores (e.g., monensin, lasalocid, semduramicin, narasin, and salinomycin) as adverse reactions may occur. If signs of toxicity occur, discontinue use of medicated feed. Protect from excessive temperatures that exceed 104° F (40° C). Do not store at warm temperatures, 104°F (40° C), for more than 7 days.

INGREDIENTS
Grain Products, Processed Grain By-Products, Plant Protein Products, Roughage Products, Calcium Carbonate, Lignin Sulfonate, Dicalcium Phosphate, Salt, Extracted Citric Acid Presscake, Saccharin Sodium, Natural and Artificial Flavors, Sodium Propionate (A Preservative), Ferric Sulfate, Zinc Sulfate, Manganese Sulfate, Copper Sulfate, Calcium Iodate, Choline Chloride, Sodium Selenite, Vitamin E Supplement, Calcium Pantothenate, Niacin Supplement, Biotin, Vitamin A Supplement, Menadione Nicotinamide Bisulfite, Pyridoxine Hydrochloride, Riboflavin Supplement, Folic Acid, Vitamin B12 Supplement, Vitamin D3 Supplement, Mineral Oil, L-Lysine, Dehydrated Pichia Pastens Fermentation Extract, Bentonite, Hydrated Sodium Calcium Aluminosilicate.

FEEDING DIRECTIONS

Gestation sows and gilts
Feed each sow or gilt 4.5 lb per day. Adjust feeding level of MoorMan's ShowTec Sow Ration to maintain proper body condition. Thirty days before farrowing, gradually increase the amount fed so that at farrowing time each sow or gilt is consuming 6 to 8 lb daily.

Lactating sows and gilts
Feed a limited amount (2 to 4 lb) of this product on the day of farrowing. Gradually increase the amount fed so that 7 to 10 days after farrowing the sows and gilts are either on full feed or to the desired level for lactating animals.

Developing gilts
Remove gilts from the finishing lots at approximately 150 lb. Feed each developing gilt 5 lb of this product daily until 'flushing' at approximately 8 months of age. One week prior to breeding, the gilts should receive 6 to 8 lb daily of this product.

Bears
Feed each boar 4 to 5 lb of this product daily during the non-breeding season and 5 to 7 lb daily during the breeding season. Adjust the amount to maintain proper body weight.

The complete feed is to be fed continuously as the sole ration. Provide clean, fresh water at all times.

For those producers desiring a four-phase feeding program, choose phase 1, 3, 5 and 7. For a tailored farm-specific grow-finish feeding program, contact your ADM sales representative or nutritionalist.

Breeding Herd: For use of this product in rations for the breeding herd, refer to mixing instructions for Purina Prolact® Sow Boost™ 25.

*Reduce amount of grain in ration with corresponding amount of Paylean pack. Paylean can be used for the last 45-50 lb of weight gain. Paylean is not a trademark of ADM.

CAUTION: Use this product as the sole source of selenium. Added selenium above 0.3 ppm in the final complete ration is not permitted.

ACTIVITY DRUG INGREDIENT

Peucedran Methylene Digluconate

AN INSECT GROWTH REGULATOR, WHICH PREVENTS THE DEVELOPMENT OF MUSCULOSKELETAL FLY IN THE MATURE MALE STAGE (INCLUDING GALLFLIES AND BEADING STOCK).

ACTIVE INGREDIENT:

Pyrethrum Citronella Oil

0.0014%

OTHER INGREDIENTS:

99.957%

Contains 4.005% of Pyrethrum citronella oil.

Total 100.000%

GUARANTEED ANALYSIS:

Ground Corn, Dried Distillers' Solubles Meal, Dried Whey, Soybean Hulls, Animal Fat (A Preservative), Feeding Cattle Meal, Sodium Benzoate, Distilled White Spirit, Fish Meal, Calcium Carbonate, Lignin Sulfonate, Molasses, Blood Meal, Salt, Calcium Phosphate (A Preservative), Zinc Oxide and Copper, Used Citrus Acid, Barley Malt, Copper Sulfate, Chlorine Sodium, Ferric Sulfate, Zinc Sulfate, Manganese Sulfate, Calcium Carbonate, Yeast Culture (Saccharomyces cerevisiae), Dicalcium Phosphate, Zinc Oxide, L-Lysine, Mecobalamin, Choline Chloride, Choline Bitartrate, Riboflavin Supplement, Calcium Pantothenate, Menadione Dimethylbromide, Biotin, Niacin, Vitamin B12 Supplement, Calcium Iodate, Zinc Sulfate, Manganese, Copper, Sodium Selenite, Potassium Chloride.

KEEP OUT OF REACH OF CHILDREN

CAUTION

USE AND MIXING DIRECTIONS

STORAGE AND DISPOSAL: Do not contaminate water or food for storage or disposal.

STORAGE: Store in a cool, dry place. Do not contaminate with pesticides or herbicides.

PESTICIDE INSTRUCTIONS: Wash hands resulting from the use of this product may be carried on to the body after washing with soapy water.

CONTAINER DISPOSAL: Completely empty into application equipment. Then dispose of empty container in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

FEEDING DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with the labeling. This product is for the development of house flies, stable flies, face flies, horn flies, and muscoid flies in the mature male stage, but is not effective against adult flies. Begin use early in the spring. Do not use before flies begin to appear and continue feeding throughout the summer and into the fall until cold weather restricts fly activity. In some cases, supplement fly control measures may be needed to control pasture flies and feed flies which are found in other areas, including organic matter or slurry in the barn, or to manage flies in other locations.

ShowTec BB 18 BMD/DBZ is a complete feed formulated for growing pigs for exhibition. Feed at the rate of 0.01% per pound per day to animals weighing 300 lbs to provide 0.02 mg of dibenzocarb per kg (2.2 mg/kg) daily. This is to be used for effective weight gain. Provide clean, fresh water at all times.

NOTICE: Do not use any finished feed (supplement, concentrate or complete feed) containing in excess of 2% medicated feed.

FEEDING DIRECTIONS
MoorMan's ShowTec Sale Burst w/DF is a complete feed specifically formulated for pigs weighing 35 to 75 pounds. Feed continuously as sole ration or premix or in a diet where other feedstuffs are available. Use as sole source of Tamulin. Tamulin being treated with Tamulin should not have access to feeds containing polypeptide antibiotics (e.g., tylosin, bacitracin, monensin, and salinomycin) and other feed ingredients that could cause adverse reactions. If signs of toxicity occur, discontinue use of medicated feed. Protect from excessive temperatures that exceed 104°F (40°C). Do not store at warm temperatures, 104°F (40°C), for more than 7 days.

WARNING: Withdraw 2 days prior to slaughter.

CAUTION: Do not feed to animals other than swine. The effects of Tamulin on swine reproductive performance, pregnancy and lactation have not been determined. Use as the sole source of Tamulin. Swine being treated with Tamulin should not have access to feeds containing polypeptide antibiotics (e.g., tylosin, bacitracin, monensin, and salinomycin) and other feed ingredients that could cause adverse reactions. If signs of toxicity occur, discontinue use of medicated feed. Protect from excessive temperatures that exceed 104°F (40°C). Do not store at warm temperatures, 104°F (40°C), for more than 7 days.

NOTICE: Do not use in any finished feed (supplement, concentrate or complete feed) containing in excess of 2% salinomycin.

FEEDING DIRECTIONS

MoorMan's ShowTece Burst Starter™ w/DF is a complete feed specifically formulated for pigs weighing 15 to 50 pounds. Feed at the rate of 5% of body weight to provide 10 mg of chlortetracycline per pound of body weight daily. For example, feed at the rate of 1.0 lb per head per day to pigs weighing 20 lbs. Feed continuously at the same rate for 14 days. Then they should be changed over to an approved ShowTece ration for pigs of this weight. Provide clean, fresh water at all times.

CAUTION: Do not feed to animals other than swine. The effects of tamulin on swine reproductive performance, pregnancy and lactation have not been determined. Use as the only source of chlortetracycline and tamulin. Swine being treated with tamulin should not have access to feeds containing other tetracyclines (e.g., minocycline, doxycycline, minocycline, and oxytetracycline) as adverse reactions may occur. If signs of toxicity occur, discontinue use of medicated feed.

Protect from excessive temperatures that exceed 104°F (40°C). Do not store at warm temperatures, 104°F (40°C), for more than 7 days.

Tiamulin (17.8 mg/kg) 35 g/l

INGREDIENTS

Ground Corn, Dehulled Soybean Meal, Rolled Oats, Dried Whey Product, Animal Fat, BHT (A Preservative), Soybean Hulls, Fish Meal, Sodium Benzoate, Maltodextrin, Animal Plasma, Lignin Sulfonate, Monosodium Phosphate, Porcine Red Blood Cells, Calcium Carbonate, Zinc Oxide, Hydrolyzed vegetable oil, Mono and diglycerides of edible fatty acids, Silicon dioxide, Glucose, Ammonium formate, Formic acid, Propionic acid (preservative), Acetic acid, Benzoic acid, Sorbic acid (preservative), Citric acid, Propylene glycol, L-Lysine, Extracted Citric Acid Pressrates, Corn Syrup, Refined Edible Oils, Copper, Choline Chloride, Calcium Propionate (A Preservative), Salt, L-Theanine, DL-Methionine, Yeast Culture, Ferric Sulfate, Zinc Sulfate, Manganese Sulfate, Basic Copper Chloride, Calcium Iodate, Dried Trichoderma reesei fermentation product, Dried Bacillus Licheniformis Fermentation Product, Dried Bacillus Subtilis Fermentation Product, Selenium Yeast, Chromium Propionate, Vitamin E Supplement, Calcium Panthenolate, Niacin Supplement, Biotin, Vitamin A Supplement, Methionine, Nicotinamide, Souffle, Pantothenic Acid, Choline Chloride, Suplement, Folacin, Vitamin B12 Supplement, Vitamin D3 Supplement, Natural and Artificial Flavors, Dehydrated Rye Products, Dehydrated Yeast, Soybean Solubles

FEEDING DIRECTIONS

MoorMan’s ShowTec Burst Starter w/DF is a complete feed specifically formulated for starting pigs. Feed continuously as the sole ration to pigs weighing 15 to 50 lbs at the onset of swine dysentery but where signs of disease are not yet evident or following approved treatment of disease. Transition pigs to the appropriate MoorMan’s ShowTec product for the weight of the pigs being fed. Provide fresh, fresh water at all times.

WARNING: Withdraw 2 days prior to slaughter.

CAUTION: Do not feed to animals other than swine. The effects of tiamulin on swine reproductive performance, pregnancy and lactation have not been determined. Use as the only source of tiamulin. Swine being treated with tiamulin should not have access to feeds containing polychlorinated biphenyls (PCBs) and/or polychlorinated dibenzo-p-dioxins, polychlorinated dibenzo-p-dioxins or polychlorinated dibenzo-p-dioxins as adverse reactions may occur. If signs of toxicity occur, discontinue use of medicated feed.

Protect from excessive temperatures that exceeds 104°F (40°C). Do not store at ambient temperatures, 104°F (40°C) for more than 7 days.

NOTICE: Do not use in any product feed (supplement), concentrate or complete feed containing in excess of 2% benzoate.

KEEP OUT OF REACH OF CHILDREN

CAUTION

USE AND MIXING DIRECTIONS

STORAGE AND DISPOSAL: Store in dry area. Do not contaminate with pesticides or fertilize.

PESTICIDE DISPOSAL: Wedges resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning, in a way that will not create smoke.

MIXING AND FEEDING DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product only prevents emergence of adult horn flies from the manure of treated cattle. Begin use in the spring before horn flies appear on cattle and continue feeding until cool weather restricts horn fly activity. Introduction of the product when significant numbers of adult flies are present may require the use of residual sprays or dusts.

Feed at the rate of 0.0175 lbs per 100 pounds bodyweight to cattle weighing over 700 pounds to provide 0.5 mg chlortetracycline per pound of bodyweight per day and 34 mg of methoprene per 100 lbs of bodyweight per month. For example, mix and feed at the rate of 0.25 lb per head per day to cattle weighing 1400 lbs to provide 700 mg chlortetracycline per head per day and 34 mg of methoprene per 100 lbs of bodyweight per month. This product is not designed for free-choice feeding. Provide clean fresh water at all times.

WARNING: Zero-Drug withdrawal period. A withdrawal period has not been established for this product in pre-natantating calves. Do not use in calves to be processed for veal.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions. The addition to feed of higher levels of this premise containing selenium is not permitted.
