

Partner with ADM on
REGENERATIVE AGRICULTURE for:

Your Sustainable Sourcing & Environmental Impact Goals

ADM is your go-to partner to meet the emerging sustainability needs of your stakeholders and customers. Let us help you reach your sustainability goals with our **re:generations™** regenerative agriculture program and regeneratively sourced flours linked directly to your supply chain.

ACHIEVE MORE WITH ADM

Whether for corporate commitments, supply resiliency or to enhance your brand, ADM's data-driven, farmer-centric program helps enable supply chain carbon reductions, positive environmental outcomes and more.

Your goals. Our expertise.

Discover how ADM is paving the way with the commitments, investments, and solutions that make a positive impact toward a brighter future for us all.

For more than a decade, ADM has been supporting sustainable and regenerative agriculture programs, and we continue to scale our efforts. In 2023, we worked with growers around the world to implement regenerative practices on more than 2.8 million acres.

ADM: A Trusted Regen Ag Partner

Leading companies, governments, and ag organizations work with ADM to advance regenerative agriculture because ADM's innovative, farmer-centric approach delivers direct supply chain impact with multiple benefits.

Reduced
Greenhouse Gas
Emissions

Improved
Biodiversity, Soil
& Water Quality

Increased Supply
Resilience

Stronger Farmer
Connections

Your Sustainable Journey. Our Expertise.

ADM has the right solution no matter where you are on your sustainability journey. Whether you're looking to increase supply resiliency, enhance your brand or reduce supply chain greenhouse gas emissions, we have an industry trusted regenerative agriculture program or turnkey regeneratively sourced flours that help you achieve your goals.

Meeting You Where You Are: Sustainable Solutions for Every Need

HARVESTEDGE™ GOLD REGENERATIVELY SOURCED FLOUR

ADM sources wheat from farmers enrolled in programs that support the implementation of regenerative agriculture practices. This wheat is then milled into flour at one of our U.S. facilities utilizing 100% renewable electricity.

ADM RE:GENERATIONS™ PROGRAM

ADM partners directly with farmers who are committed to regenerative agriculture, enrolling their acres into our re:generations™ program. This unique collaboration allows us to directly source from farms that prioritize soil health, biodiversity, and long-term land resiliency. By working hand-in-hand with farmers, we ensure that every acre enrolled in our program supports regenerative practices that benefit both the environment and the customers we serve.

HarvestEdge Gold

Regeneratively Grown White Sorghum Flour

Our special ancient grain white sorghum flours have a mild flavor that can be used to enhance a range of wheat-based or gluten-free baked goods and snacks. ADM's white sorghum is 100% sourced from farmers implementing regenerative agriculture practices that reduce environmental impacts near ADM's certified gluten-free Dodge City, KS mill where it's processed.

HarvestEdge Oro

Sustainably Sourced 00 Style Pizza Flour

ADM makes it possible to deliver authentic, Neapolitan-style pizzas with a crisp and chewy crust. We source wheat from producers that are implementing regenerative agriculture practices such as cover crops, conservation tillage and precision nutrient management, and mill into flour at one of our U.S. facilities utilizing 100% renewable electricity

ADM regeneratively
sourced flour

How does it work?

Direct Impacts on your ADM Sourced Flour

Flour that is milled from acres mapped to your supply shed offer credible, farm level reduction outcomes that you can use to meet your Sustainability goals.

STEP 1 You Purchase Regeneratively Sourced Flour

ADM aligns your flour volumes with regeneratively-managed acres of wheat sourced from re:generations™ farmers implementing regenerative practices that support environmental impacts including land resiliency, soil health, and improved biodiversity.

STEP 2 Your Company Benefits

Correlate your supply shed to wheat sourced from re:generations™ farmers to make product claims for your regeneratively sourced flour across metrics, including:

- Sustainable sourcing
- Sourcing transparency
- Enhanced employee engagement
- Increased product differentiation
- Consumer messaging

Regenerative Agriculture 101

If it seems like you are suddenly hearing the expression ‘regenerative agriculture’ all the time, you are right. The concept of ‘regen ag’ has gained considerable traction in the past couple of years. In 2023, 77% of consumers stated they were aware of regen ag, an increase of 20 points vs 2021.¹

Why Regenerative Agriculture?

As the world becomes increasingly concerned about climate impact, stakeholders are demanding change and holding companies accountable for sustainably operating. In response, companies are setting climate goals to address supply chain Scope 3 emissions and increase crop resilience, which regenerative agriculture practices can address.

What are Scope 3 Emissions?

A company’s greenhouse gas footprint (which includes carbon) includes three scopes, but the majority of environmental impact is usually in Scope 3, specifically purchased ingredients. Regenerative agriculture addresses Scope 3 emissions by focusing on reducing the environmental impact of purchased ingredients.

Investors

90% of global institutional investors will revise investments if companies do not consider ESG criteria in their business model.²

Employees

Sustainability is a top criterion in choosing an employer for 2/3 of those under age 34.³

Consumers

84% of U.S. consumers say they would pay more for food products that are sustainably sourced.¹

CARBON EMISSIONS

SCOPE 1: DIRECT

- Company Facilities
- Company Vehicles

SCOPE 2: INDIRECT

- Purchased Energy

SCOPE 3: INDIRECT

- Purchased Ingredients & Services
- Transportation
- Distribution

What is Regenerative Agriculture?

ADM defines it as a system of practices that sequester carbon in the soil and intentionally improve soil health, biodiversity, water quality and air quality while ensuring the viability of farm production. Adapted to local physical conditions, regen ag revolves around five guiding principles that create positive outcomes and enable long term impacts.

Principles & Practices: Regenerative Agriculture Summary

Maintain Living Roots in Soil

Cover Crops

Maximize Diversity: Crops, Soil, Pollinators

Crop Rotation

Edge of Field Practices

Minimize Soil Disturbance

Conservation

Tillage

Continuously Cover Bare Soil

Cover Crops

No Till

Responsibly Manage Inputs

Fertilizer & Pesticides

KEY REGENERATIVE AGRICULTURE PRINCIPLES

- Keep soil covered
- Minimize soil disturbance
- Maximize biodiversity
- Maintain living roots
- Responsibly manage inputs

POSITIVE OUTCOMES

- Combat climate change
- Improves land resiliency
- Increases farm profitability
- Supports water quality

LONG-TERM IMPACTS

- Farm profitability
- Soil health
- Biodiversity
- Watershed health

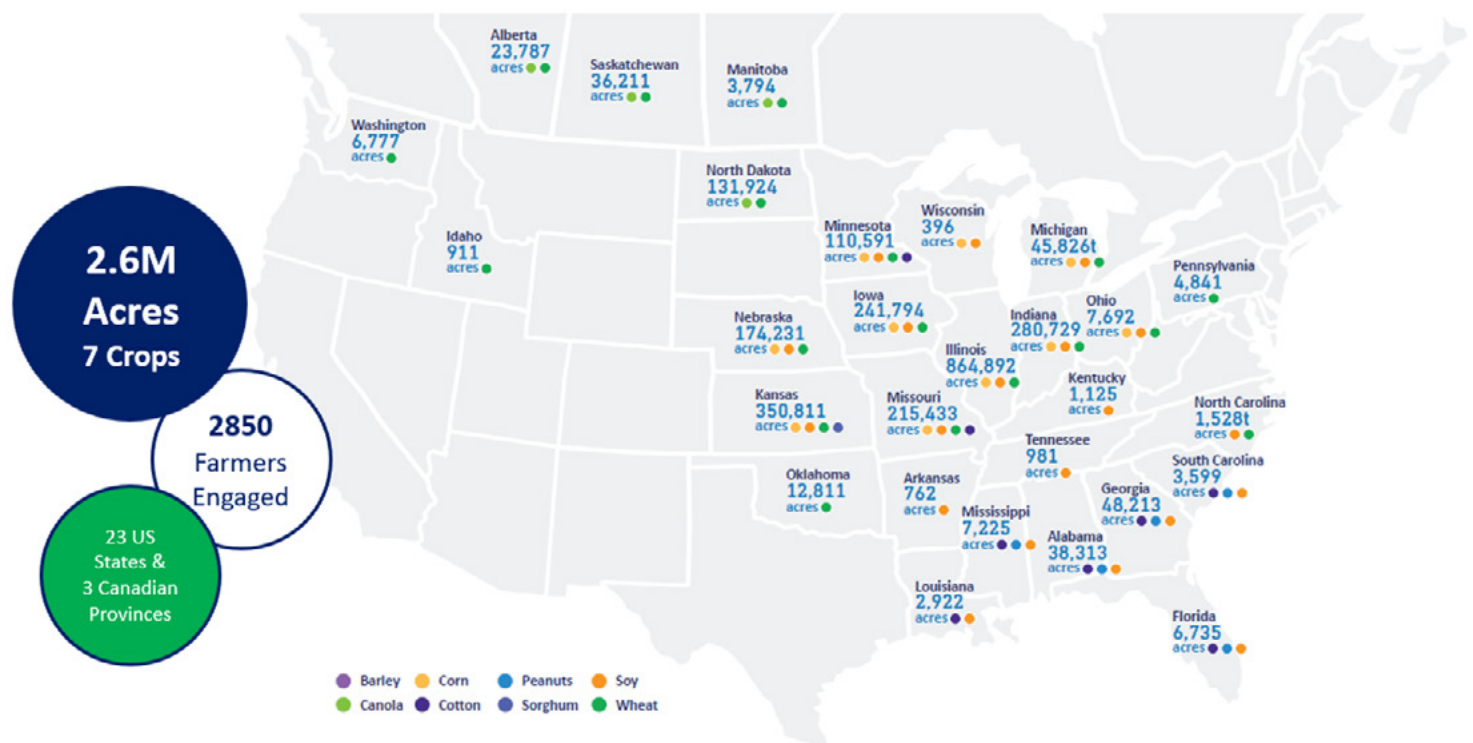

ADM re:generations™

Why ADM?

Our scope and partnerships make us your one-stop shop for sustainable sourcing

2023 NA Regenerative Agriculture Projects

Our scope and scale make us your one-stop for sustainable sourcing.

World Class Technical Partners

ADM's project partners are experts that carry credibility with farmers and help accelerate field level practices.

Beyond wheat

ADM offers coverage across a variety of commodities.

CORN

COTTON

WHEAT

CANOLA

SOY

BARLEY

PEANUT

SORGHUM

Beyond Carbon:

ADM Delivers More

ADM's regenerative agriculture program and regeneratively-sourced flours enable benefits beyond Scope 3 GHG emissions reductions - creating measurable impact that addresses corporate commitments, mitigates supply risk, or enhances your brand.

Why ADM?

- Direct supply chain impact
- Data-driven, farmer-centric approach
- A decade of experience & expertise
- Scalable, multi-crop network
- Brand insights & messaging support
- Close relationships with growers & technical partners

How Can You Benefit?

Reduce Scope 3
GHG Emissions

Improve Soil,
Biodiversity &
Water Quality

Increase Supply
Transparency

Mitigate Risk via
Farm Resilience

Expand Farmer
Connections

Enhance
Brand

ADM Advantage

Direct Grower Connections

Enabling transparency through stronger supply communications opportunities, and long-term program success.

Grower Events

Grower appreciation events strengthen your connection to producers and the source of your key ingredients.

On-Farm Events

On-farm events feature tech partners that help scale regen ag practice adoption, and advance your goals.

Farm Family Meet-Ups

Direct farm family meet-ups enable transparency and supply chain messaging/story telling.

Our purpose is to unlock the power of nature to enrich the quality of life

At ADM, sustainable practices and a focus on environmental responsibility are not separate from our primary business: they are integral to the work we do every day to serve customers. Our sustainability strategy is organized into three pillars with a variety of actions under each.

Feed the
World

Protect
Nature

Enrich
Lives

ADM. Your Go-To Sustainability Partner.

The commitments, expertise and scale to achieve your goals & create impact.

Ambitious Environmental Targets & Investments

Targets across GHG Emissions, Energy, Water & Waste
Investments in De-carbonization & Renewable Energy.

Regen Ag Leadership & Direct Grower Connections

Expanding our program across millions of acres to help you address sustainability goals.

Supply Chain Scale

Our vast footprint and extensive range of commodity crops make for one-stop sustainable sourcing.
