

Choose ADM to achieve: **Your Sustainable Sourcing & Environmental Impact Goals**

As the world becomes increasingly concerned with climate change, sustainability has become a corporate imperative. ADM is uniquely positioned to help you address your climate goals—through our sustainably sourced flours and regenerative agriculture programs linked directly to your supply chain.

Your Goals. Our Expertise.

For over 20 years, ADM has been supporting sustainable and regenerative agriculture programs. Globally, we are working with growers in our supply chain to implement regenerative agriculture practices increasing our engagement annually with a goal to achieve 4 million acres by 2025.

Discover how our sustainably sourced flours make it turnkey for you achieve your sustainability and environmental impact goals that also helps differentiate your brand and increase relevance with consumers.

At ADM, we know that sustainable agriculture requires good stewardship of the natural systems and resources that farmers rely on for crop production.

The objective of our sustainable agriculture efforts is to **help our supply chain meet society's commodity needs without compromising our future ability to produce.**

Farm to Finished Product

Our Process

Every step in our integrated supply chain can help you achieve your sustainability goals. With our comprehensive approach to regenerative agriculture and net-carbon neutral mills, ADM is uniquely positioned to help you reduce your environmental footprint and address stakeholder expectations.

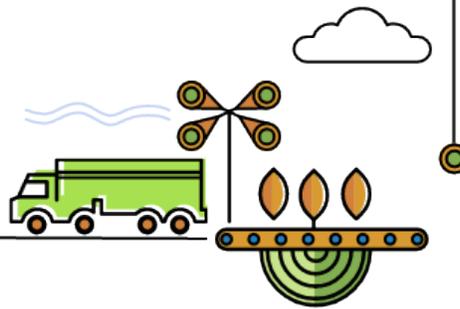

Regenerative Agriculture

We start by sourcing wheat from farmers that are implementing regenerative practices that reduce environmental impact.

Transportation & Logistics

Increasing use of renewable energy across our supply chain.

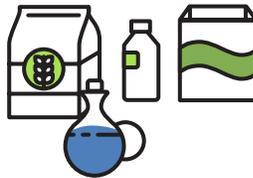

Carbon Neutral Mills

ADM's U.S. flour milling operations are now 100% net carbon neutral.

Sustainably Sourced Flour

Enabling meaningful environmental improvements.

Solutions that Drive Impact

ADM's programs help make a direct impact on Scope 3 emissions in your supply chain. Our integrated approach connects you to fields and growers, linking your finished products back to the farm for transparency and quality connections that matter to consumers.

HarvestEdge™ Gold Sustainable Solutions

ADM can help you achieve your responsible sourcing and environmental impact goals with our sustainably sourced flours and regenerative agriculture programs *linked directly to your supply chain*.

Farm-to-Table Transparency

Identity Preserved/Direct Sourcing programs and Grower Connect farmer profiles for supply chain connections and brand benefits.

Sustainably Sourced Flours

Our HarvestEdge® portfolio of sustainably sourced options includes flours, specialty flours and ancient grains.

Lower Environmental Impact

ADM re:generations™ Regenerative Agriculture Programs.

Sustainably Sourced Flour Options

HarvestEdge® Gold Sustainably Sourced Wheat Flour

ADM sources wheat from farmers that are enrolled in programs that help them implement regenerative agriculture practices and is milled into flour in our net-carbon neutral facilities. Available as an option across our entire portfolio of wheat flours.

HarvestEdge® Gold Sustainably Sourced Sorghum Flour

Our special ancient grain white sorghum flours have a mild flavor that can be used to enhance a range of wheat-based or gluten-free baked goods and snacks. ADM's sorghum is 100% sourced from farmers implementing regenerative agriculture practices that reduce environmental impacts near ADM's certified gluten-free, verified net-carbon neutral Dodge City, KS mill where it's processed.

HarvestEdge® Oro Sustainably Sourced 00 Style Pizza Flour

ADM makes it possible to deliver authentic, Neapolitan-style pizzas with a crisp and chewy crust. We source wheat from producers that are implementing regenerative agriculture practices such as cover crops, conservation tillage and precision nutrient management, and mill into flour at our net-carbon neutral facilities.

HarvestEdge® Gold Certified Sustainable Flour

Food Alliance certified sustainable for verified, third-party endorsement of sustainable standards. ADM sources wheat directly from local family farms that are implementing regenerative agriculture practices near our net-carbon neutral mill in Spokane, WA.

ADM re:generations™: Regenerative Farming Practices

At ADM, we work together with growers to identify and implement regenerative farming practices that reduce GHG emissions, improve soil health, protect water quality, sequester carbon and increase farm resiliency.

PRINCIPLES

ADM adheres to principles of a regenerative agriculture system that are based in indigenous ways of land management and are adaptive to local physical conditions and culture.

- **Maintain living roots in soil**
Cover crops
- **Maximize diversity: crops, soil, pollinators**
Crop rotation
Integrated pest management
- **Minimize soil disturbance**
Conservation tillage or no till
- **Continuously cover bare soil**
Cover crops
No till
- **Responsibly manage inputs**
Fertilizer & pesticides

RECRUITMENT & SUPPORT

With a vast and growing U.S. network of 60,000 growers, 220 originators & 3 climate smart origination managers, ADM hosts annual grower meetings to show appreciation and maintain transparency on overall sustainability trends and your goals.

DATA GATHERING & RESULT ANALYSIS

ADM and Farmers Business Network utilize best-in-class technology and comprehensive industry resources to gather data and calculate results, for a high degree of confidence with credibility and trust from growers.

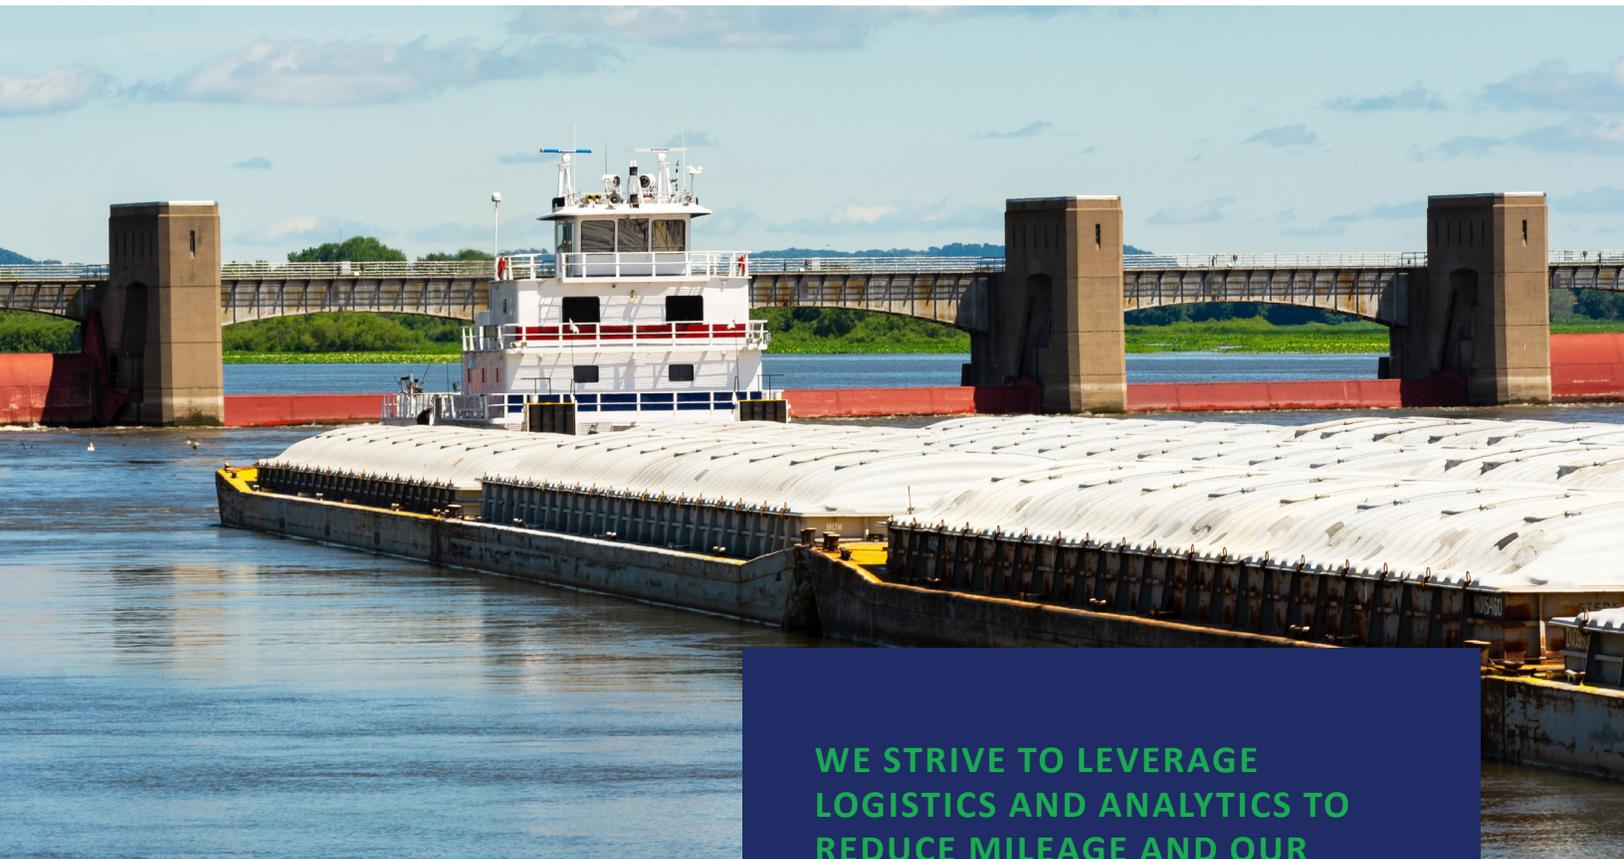

ADM regenerative program reports provide you with credible and verifiable results.

GROWER CONNECT™

At ADM, cultivating relationships with farmers is an integral part of the sustainable sourcing process. Grower Connect™ represents the long-standing connections we have forged with local producers, offering you a link to farm families and their journey to advance more sustainable and regenerative practices.

Grower Connect™ provides you with greater transparency into the people and places behind our products, enabling stronger connections for your brand.

Transportation & Logistics

Designed to connect customers with crops in the most efficient ways possible, ADM has one of the largest global transportation networks, including:

28,000+
RAILCARS

1,500+
SEMI-TRAILERS

2,500+
RIVER BARGES

WE STRIVE TO LEVERAGE LOGISTICS AND ANALYTICS TO REDUCE MILEAGE AND OUR FLEET FOOTPRINT.

As a U.S. EPA SmartWay Certified carrier, our trucking fleet is implementing several fuel economy improvements, including:

- **upgrading to vehicles with automatic transmissions, adaptive cruise control and governed speed, to optimize fuel economy**
- **swapping out dual tires for super single/wide base tires, to increase fuel efficiency**

In addition, we blend our own fuel with ADM-produced biodiesel, allowing our fleet to run on a 20-30% biodiesel blend rather than the standard 5% blend available at commercial fuel stations. We are continuing our trials of compressed natural gas and 100% biodiesel fueled trucks, with positive initial results.

Processing & Refining

At ADM, we have a robust Environmental Management System (EMS) aligned with ISO to manage our operations and facilities. We minimize our impacts to the environment by following different foundational procedures and ensuring we meet our environmental obligations.

Our Strive 35 environmental goals guide the tracking and implementation of programs globally across our operations. This program has 4 key environmental goals as it relates to our U.S. operations: emissions, energy, water, and waste.

ADM's U.S. Mills Have Achieved Carbon Neutrality By:

INCREASED OPERATIONS EFFICIENCIES

We've reduced the environmental impact of our flour mills by implementing **200+ projects** that have saved thousand of kilowatts of energy

RENEWABLE ENERGY USE

Over the last ten years, we've **reduced our energy needs by 25%**, and are working to purchase more of our power needs via renewable energy

CARBON CAPTURE & STORAGE

ADM has launched the **first large scale project** to capture and permanently sequester carbon underground, which compensates emissions

CARBON CAPTURE TECHNOLOGY

To further reduce our carbon footprint, ADM has been advancing carbon capture and storage (CCS) technologies.

Under the Industrial Carbon Capture and Storage (ICCS) Program, the U.S. Department of Energy (DOE) has collaborated with industry partners to develop technologies that will capture carbon dioxide emissions. ADM operates a successful large-scale CCS project located in Decatur, Illinois that is permitted to sequester 1.1 million metric tons of CO₂ annually.

ADDITIONAL CLIMATE SMART PRODUCT OPPORTUNITIES

SOY

Oil, Meal, Flour, Proteins

CORN

Oil, Meal, Gluten, Starches, Sweeteners, Ethanol

WHEAT

Flour, Germ, Bran, Shorts, Middlings, Protein

PEANUT

Peanuts, Oil, Flour

ADM IS YOUR PARTNER IN SUSTAINABLE SOURCING FOR A BETTER TOMORROW

Climate

protecting the planet through our actions

Integrity

promoting human rights and social responsibility

People & Communities

supporting others at home and around the globe

Why Partner with ADM for Sustainable Solutions

- ✓ **CONSISTENT**
Standardized metrics across a variety of crops
- ✓ **CONVENIENT**
One source across wheat, soy, corn and more
- ✓ **CREDIBLE**
Direct supply chain impact (Inset vs Offset)
- ✓ **SCALABLE**
Extensive sustainable ag footprint
- ✓ **CUSTOMIZABLE**
Flexible and diverse options tailored to your goals
- ✓ **TURNKEY**
A range of solutions ready to launch today
- ✓ **COMMITTED**
Long-term investments and experienced staff
- ✓ **VERIFIED**
Farm to finished product
