

# A Sweeter Standard of Value & Performance

Extracted from the stevia plant, our versatile lineup of SweetRight® stevia goes beyond sweetness to help you achieve an ideal balance of taste, functionality and cost efficiency.

Superior sweetening for improved sensory and taste performance

Greater potency and effective brix replacement

Higher dosage achieves greater sugar and calorie reduction for optimal results

Reduced linger and less bitterness for a more refined taste balance

Optimized efficiency for better cost-in-use value

## Research & ingredient innovation

Our proprietary research develops new steviol glycosides to improve sensory output year after year.

- Next-generation offerings developed through advanced agronomy, plant purification and cross-breeding varietals
- Expert extraction direct from the stevia leaf
- Sweetness optimization through bioconversion for cost improvement and process efficiency
- Commitment to quality, reliability and transparency in sourcing

## Taste development excellence

We harness the best parts of the stevia leaf to deliver superior taste and performance.

- Higher usage rates with improved sweetness
- Balanced sensory profile with reduced off-notes and linger
- Achieve greater calorie and sugar reduction without compromising on taste
- Sensory evaluation tools for understanding taste perception

## Formulating for market success

ADM's Replace Rebalance Rebuild® method delivers turnkey sugar replacement, balances taste and rebuilds functionality of lost sugars.

- Full-sugar replacement development
- Fast and efficient speed to market to stay ahead of consumer demand
- World-class supply chain, logistics and farm relationships

# Extracted from Nature. Crafted for Taste.

## Full suite of stevia solutions

Our evolving line of stevia ingredients reflects continuous innovation to improve taste, quality, functionality and cost improvement. ADM's comprehensive stevia suite is crafted to meet evolving consumer demands for calorie reduction, cleaner labels and overall wellness.

## Backed by ADM's high-quality standards and reliable supply, our SweetRight® stevia portfolio offers a myriad of key benefits:

- Enables full-sugar replacement
- Zero calories, added/total sugars and glycemic index
- Ease of replacing alternative sweetening systems
- Delivers optimal taste and mouthfeel with a clean label
- Advanced stevia minimizes reliance on masking agents, taste modifiers or bitter blockers
- Labeling options vary by production method and region, providing a range of cost-optimized solutions with consumer appeal

### Edge™ Portfolio

Direct from the leaf, this next-generation line of stevia solutions is formulated to deliver preferred taste while maintaining the cleanest label.

### Echo™ Portfolio

ADM's line of bioconverted solutions amplifies the value of the stevia leaf, producing premium sweetness quality and enhanced cost savings.

### Reb A Portfolio

Traditional Reb A stevia leaf provides options for finding the right stevia for each unique product with cost-effective sweetening.
