

**Status Report Pursuant to Administrative Order on Consent,
Docket No. SDWA-05-2025-0001, Paragraph 68
January 15, 2026**

This Status Report describes the actions taken by ADM in accordance with Paragraph 68 of the Administrative Order on Consent (AOC), and includes the following information:

- a) A description of the actions that have been taken towards achieving compliance with this AOC during the previous two months, including an assessment of milestones due, whether they were met, and, if not, what actions will be taken or planned to meet the milestones, the timeline for meeting milestones, and any impact on future milestones;
- b) An assessment of the effectiveness of such actions;
- c) A summary of all Permit violations that occurred in the previous two months; and,
- d) An analysis of the cause of each such Permit violation.

Paragraph 68 (a): Actions taken towards achieving compliance with the AOC

ADM has taken multiple actions towards achieving compliance with the AOC in the two-month period since the submission of its First Status Report, dated November 15, 2025, (Second Status Report Period), including:

- Timely completing and submitting the First Status Report as required under Paragraph 68 by November 15, 2025; and,
- Timely completing and submitting permit modifications for injection wells CCS#1 and CCS#2 by December 11, 2025, in accordance with Paragraph 67(i).

All actions required under the AOC during the Second Status Report Period were timely completed. ADM submitted its permit modifications on November 26, 2025, in advance of the due date of December 11, 2025, in accordance with Paragraph 67(i). As all requirements of the AOC during the Second Status Report Period were timely satisfied, a discussion of actions to be taken to complete the unmet requirements is inapplicable.

In addition to the items required by the AOC, ADM also submitted updated permit applications for proposed injection wells CCS#3, CCS#4, CCS#5, CCS#6, and CCS#7. The additional CCS permit modifications and applications are part of ADM's proposed CCS project for the Decatur and Maroa areas.

Paragraph 68(b): Assessment of Effectiveness of Actions

As referenced in section (a) above, ADM's actions were effective in meeting all applicable requirements during the Second Status Report Period. ADM submitted its permit modifications in accordance with Paragraph 67(i) on November 26, 2025. Thus, these actions also effectively meet the requirements of the AOC.

Paragraph 68(c-d): Permit Violation Analysis

No permit violations occurred during the Second Status Report Period. Therefore, a permit violation analysis is inapplicable for the Second Status Report Period.
