ADM Global

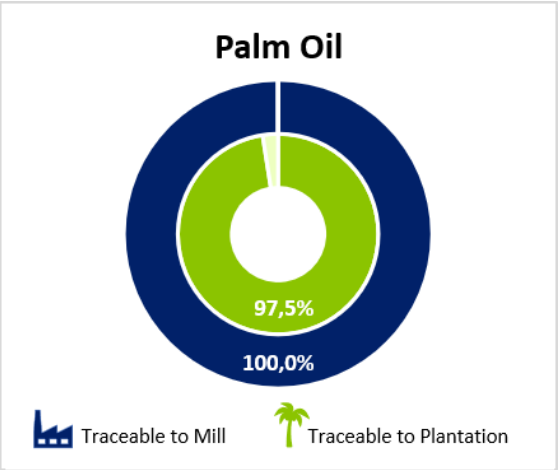

(ADM Czernin, ADM Lincoln, ADM Pura Foods***, ADM Quincy, ADM SIO, ADM Valdosta)

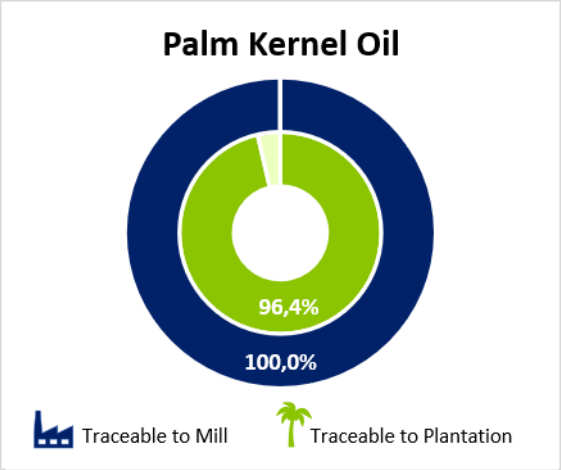

Palm Oil Supply Chain Traceability

January - December 2025

Overall Traceability

	Palm Oil	Palm Kernel Oil
Traceable to Mill	100,0 %	100,0 %
Traceable to Plantation*	97,5 %	96,4 %

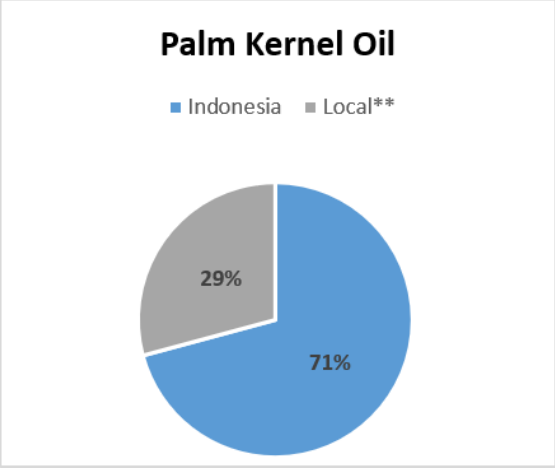

Volume Sourced by Region of Origin

The charts below represent total volumes of palm and palm kernel products sourced from various origins into ADM globally.

*Traceable to Plantation: self-reported information from suppliers that has not been verified

**Local: products sourced directly from refineries in Europe and USA

*** Does not include traceability information for feed products

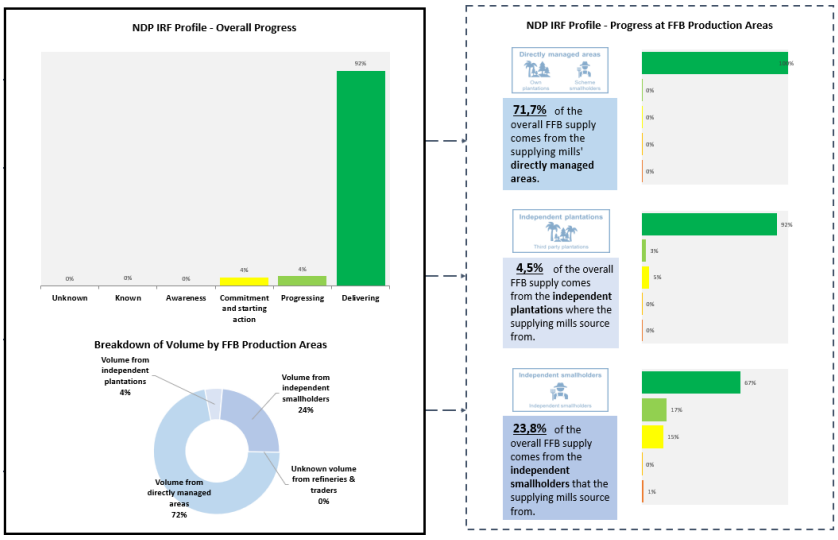

Last update: October 2, 2026

NDPE Implementation Reporting Framework

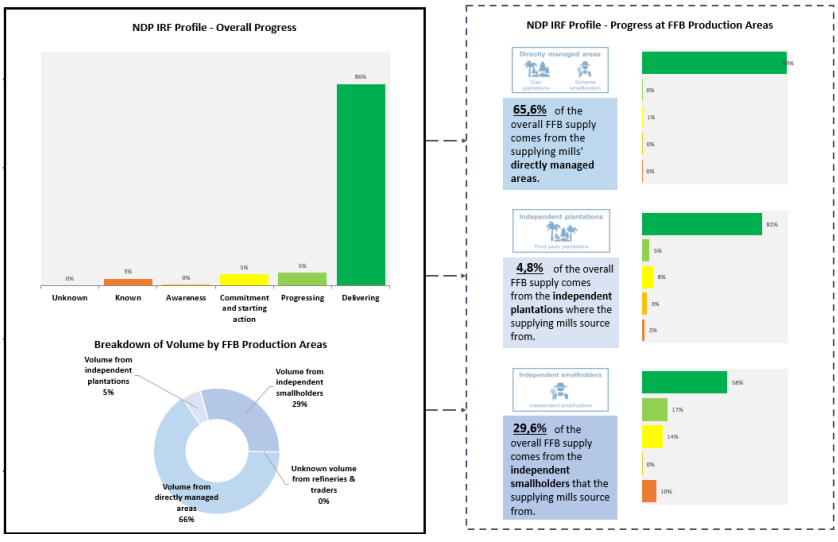

January – December 2025

In 2015, ADM committed to No Deforestation, No Peat and No Exploitation (NDPE) and has since worked to communicate our expectations to our suppliers and take actions to reinforce our goals.
ADM is a member of the Palm Oil Collaboration Group (POCG) and has actively participated in the NDPE IRF Working Group to drive progress on reporting against NDPE criteria, including the evolution of the IRF methodology toward IRF v.6.0.
The IRF is a standardized framework used to report progress toward NDPE commitments within the palm oil supply chain. With the transition from Version 5.8 to Version 6.0, stricter requirements were introduced regarding traceability, monitoring and verification, supplier engagement, and continuous improvement. For more information on the NDPE Implementation Reporting Framework, please see this website.
The following IRF Version 6.0 profile is based on information provided by ADM's suppliers and is part of our third-party verification process.

Palm Oil

Palm Kernel Oil

Facility included in the scope of this evaluation

Archer Daniels Midland Co (ADM) has achieved the following result for traceability to mill for its Palm Oil and PKO in 2025 for the following facilities.

No	Facility	Percentage of Traceability to Mill (%)	
		CPO	PKO
1	ADM Lincoln	100	-
2	ADM Quincy	100	100
3	ADM SIO	99.6	99.9
4	ADM Valdosta	100	-
5	ADM Czernin	100	100
6	ADM Pura Foods Ltd	100	100
7	ADM Global (refineries)	100	100

Summary of the methodology

1) Reported traceability figures by ADM for all the refineries included in the scope were reviewed by cross-checking information for the mills selected for the sample and delivering to a specific refinery. The traceability data is collected from suppliers' public traceability dashboards or directly consulting with their suppliers.
2) Control Union´s responsibility was to exclusively verify the accurateness and completeness of the information as received by ADM, and ADM methodology and processes for the calculation of the traceability scores for the facilities included in the scope.

Verification methodology IRF Data

Control Union Certifications has conducted a verification assessment with Archer Daniels Midland Co and the objective of the assessment was to perform a third-party review of the NDP IRF verification information by Archer Daniels Midland Co based on the requirements of the NDP IRF Verification Protocol version 6.0 August 2025. In 2025, the company sourced its raw material from 22 refiners/ traders, of which 5 samples were selected for this verification.

Statement of Impartiality

The findings, conclusions, and recommendations presented in this verification report are based on an objective and impartial assessment of the evidence gathered during the verification process. The verification team has conducted this work free from any undue influence, conflicts of interest, or bias that could compromise the integrity of the results. All personnel involved in the verification process have adhered to the highest standards of professionalism, ethics, and independence. No external pressures, financial interests, or personal relationships have influenced the outcome of this verification. This report reflects an honest and accurate representation of the facts as observed and documented during the verification activities.
